

Press Release: Saitek announces the C100X Wireless Desktop Set for a clutter-free desktop

Bristol — 20 August 2007, Saitek (www.saitek.com) today announced the launch of the C100X Wireless Desktop Set rechargeable matching keyboard and mouse.

Whether it's in the office or at home, wireless connectivity means a neat, uncluttered workspace, ideal where space is limited. The C100X Wireless Desktop Set performs just as well as its wired counterparts, and, thanks to Saitek's advanced power management system, without the need to frequently recharge or replace batteries.

The ultra slim, compact profile keyboard has high precision, soft-touch keys for faster, quieter typing, intuitive multimedia hot keys - email, browser, plus media track and volume controls – and a hardwearing, high gloss finish for durability and easy maintenance.

The 3 button precision optical mouse with scroll wheel boasts an auto power management system for long battery life with standby mode and a comfortable, ergonomic design for hours of fatigue-free use.

Both keyboard and mouse come supplied with rechargeable batteries and feature 27MHz technology to give a reliable wireless connection and range of up to 3m (10ft) – more than enough for most office or home applications. The wireless receiver connects to the PC through a USB cable and includes a recharge station to charge battery sets.

Commenting on the launch of the C100X, Maggie Heeley, Saitek Category Manager said: "Our new C100X Wireless Desktop Set is a great looking, cost-effective and efficient addition to any home or work office. It takes away the clutter of cables and offers all the functionality of a wired keyboard and mouse without the need for frequent recharges or new sets of batteries."

Compatible with all versions of Mac OS X, Windows XP and Vista, the C100X Wireless Desktop Set is the ideal addition to the discerning computer user's setup.

About Saitek:

Saitek designs and manufactures consumer electronics products which work together to improve the user's multimedia, gaming and communications experiences. Constant innovation, superior technology and a high degree of functionality make Saitek products the choice of computer users around the world.

The Saitek product range today includes mice, keyboards, headsets, PC gaming controllers, as well as other PC peripherals. The latest addition is a new family of innovative and practical audio products designed to improve users' digital entertainment experiences.
