## Press Release: Saitek launches the Cyborg range of gaming devices – the ultimate man/machine interface

**Cyborg** - a person whose physiological functioning is aided by or dependent upon a mechanical or electronic device

Bristol, 14 September 2007 – Saitek ([www.saitek.com](http://www.saitek.com)) today announced the launch of the Cyborg range of gaming devices.

Saitek's Cyborg products are designed specifically for gaming and aimed at serious gamers who demand the best equipment to help them win. These people play games intensely for long periods at a time and need controllers and peripherals which not only offer outstanding comfort, but high precision and absolute control.

Cyborg products fit the gamer like a glove and transmit their actions to the game with an almost human intuition. As well as astonishing performance, the Cyborg range of products looks stunning with serious, hardwearing, tactile materials, subtle lighting and the trademark Cyborg head logo – the badge of gaming excellence.

Commenting on the launch of the Cyborg range, Richard Neville, Saitek Category Manager, said: "Our new Cyborg range is designed so perfectly gamers won't know where they end and where the hardware takes over. Each product takes gaming performance to new levels, improving control, heightening the senses and helping gamers realise their true potential."

The initial Cyborg product line-up is the Cyborg Rumble pad, Cyborg 5.1 Headset and Cyborg Command Unit with more products to be added to the range in 2008.
