

Press Release: Back in Black - Saitek announces new GM3200 Laser Mouse model

Bristol — 20 August 2007, Saitek (www.saitek.com) today announced the launch of the new black GM3200 Laser Mouse – the world’s original 3200dpi resolution mouse.

The GM3200 Laser Mouse is designed for high-performance PC gaming as well as other activities and combines the latest precision technologies with ergonomic design for hours of fatigue-free use. Previously available in red and blue variants, the new black GM3200 has been produced in response to customer requests and features a hard-wearing carbon fibre effect casing with high grip left and right buttons, and side panels.

Mouse resolution is switchable up to 3200dpi with 4-stage on-the-fly user selection to match mouse speed to office task or game environment. The 4.5 mega pixels per second report rate also accelerates mouse movement up to 20G to instantly communicate mouse commands to the PC for lightning responses.

The GM3200 features Saitek’s SpeedGlide® system of adjustable weights and PTFE feet area so that mouse momentum can be fine-tuned to suit personal preferences and use, while 3 buttons and scroll wheel with finger-hugging contours offer precise touch and total control. The additional four buttons, including shift to double up on commands, can be programmed using Saitek’s SST software, with mouse settings and controls saved as game-specific profiles, selectable using the Profile button.

Commenting on the announcement of the black GM3200 Laser Mouse, Maggie Heeley, Saitek Category Manager said: “We’ve produced the new black version of the GM3200 to meet the needs of PC users who not only value high speed, precision, accuracy and total adjustability but also want their peripherals to fit into and complement their lifestyle environment. It performs to the same exceptional standard as the previous GM3200 but in a serious new cool design.”

Compatible with all versions of Windows XP and Vista, the GM3200 Laser Mouse is the high-performance PC gaming peripheral.

About Saitek:

Saitek designs and manufactures consumer electronics products which work together to improve the user’s multimedia, gaming and communications experiences. Constant innovation, superior technology and a high degree of functionality make Saitek products the choice of computer users around the world.

The Saitek product range today includes mice, keyboards, headsets, PC gaming controllers, as well as other PC peripherals. The latest addition is a new family of innovative and practical audio products designed to improve users’ digital entertainment experiences.
